

Sustainability Snapshot

I set up <u>HKgraphics</u> to offer graphic design services that are accessible to all types of businesses, with an emphasis on supporting my local economy and community.

My goal is to provide clients with clear, branded communications, designed with their customers in mind, whilst also reducing the impact on the planet.

I envisage a world where the design and marketing industries have minimal environmental impact so we can all contribute to a greener planet for future generations.

This is a snapshot of the practical steps I'm taking to reduce my impact on the planet, to view my full Sustainability Statement please click here.
